Sonoma™ dressers are available in three and four drawer configurations and two depths to suit a range of spaces. Drawers open easily and close securely using high quality suspensions that extend generously. Gently contoured handles provide ample hand clearance to accommodate people with reduced vision or limited mobility.

Dresser shown in Avant Honey with arc fascia and arc handles.
Sonoma dressers and bookcases are modular and align dimensionally with Sonoma wardrobes to maximize available space in the room. Sonoma is elevated off the floor to simplify housekeeping and support infection control practices.
Keep spaces free of clutter with hutches or stand-alone bookcases. Available in two heights, they feature one or more adjustable shelves for flexibility and durability.

A range of finish options and fascia profiles in warm tones bring a sense of home comfort. Custom options are also available on a project basis to support the specific needs of a facility.
## A closer look

### Tops
High pressure laminate tops feature a coordinating 3mm polymer edge, providing an easy to clean, durable, and stain resistant surface.

### Locks
A lock is available for the top drawer of all dressers. A key alike option is available, in addition to a master key for facility administration.

### Handles
Six handle options are available in coordinating finishes. All handles deliver minimal interference, gentle contours and generous hand clearance to accommodate people with reduced vision or limited mobility. Custom handle options are also available on a project basis for larger projects.

### Drawers
Dresser drawer interiors are polymer wrapped for stain and moisture resistance. Drawers can be removed for cleaning or transfer by housekeeping staff.

### Drawer Slides
Full extension ball bearing drawer slides are constructed using high quality precision steel. The optional soft close drawer slides ensure an easy and quiet closing motion.

### Shelves
Hutches and bookcases are fitted with a combination of fixed and adjustable shelves to provide flexibility and superior structural integrity.

### Wire Management
A large wire management grommet provides access for cables to connect to wall power and communication outlets.

### Ventilation
Ventilation openings are provided at the top of both side gables to promote airflow. All ventilation openings are fitted with a polymer liner for durability and cleaning. Ventilation openings also provide slots for hanging accessories.

### Chassis
Chassis panels are fully captured along the entire length of the aluminum leg framework, providing superior strength and structural integrity.

### Legs and Frame
Dresser legs and bookcase frame are constructed of heavy duty aluminum extrusions and provide superior structural integrity due to the continuous attachment along the full length of the cabinet’s frame. The legs are finished in color coordinated and environmentally friendly powder coated epoxy. Custom colors are available on a project basis.

### Accessories (Optional)
Accessories can be added on either side of the dresser and provide additional storage and quick access to magazines, facial tissue, hanging bags and other personal items. Accessories are finished in a durable, powder coated epoxy finish that matches the legs and can be easily removed for cleaning.

### Glides
Glides on all four legs are height adjustable to ensure that the top surface can be leveled or slightly angled back towards the rear fascia to reduce the likelihood of small objects rolling off the top and out of reach.
